Activity 1 - Talk to an AI Agent, Then Reflect

Purpose: Experience a real customer-service AI agent on WhatsApp, test where it helps and where it stops, then reflect on the risks and opportunities.

What you need

- Your own mobile phone with WhatsApp
- **TIA Support** on WhatsApp: **+65 8866 6375** (powered by OpenClaw)
- The class **Pinboard**: https://alfredang.github.io/pinboard/
- The prompt sheet in this folder: `PROMPTS.md`

Evidence status: SIM - all data is fictional. Do not send any real customer, guest or personal data. Use only the made-up examples provided.

Steps

1. Save **+65 8866 6375** as a contact and open a WhatsApp chat with **TIA Support**.
2. Send a short greeting so the agent introduces itself. Note how it describes what it can do.
3. Pick **one main task** from `PROMPTS.md` (for example, drafting a polite reply to a guest asking for a late 2 pm check-out) and send it. Read the reply carefully.
4. Send **one follow-up** that changes the request slightly (for example, "make it warmer and add a small apology"). See how well the agent keeps the context.
5. Send the **out-of-scope / tricky prompt** from `PROMPTS.md` and watch how the agent responds. Does it refuse, guess, or ask for more information?
6. Open the **Pinboard** and post **one short reflection per theme** - four notes in total, each starting with the theme name:

- **Data Privacy** - what data did it ask for or assume?
- **Job Impact** - what part of a real job did it speed up?
- **Ethical Concerns** - where could it mislead a guest?
- **Cyber Security** - how could someone misuse this channel?

What you produce

- One completed WhatsApp conversation (main task + follow-up + tricky prompt)
- Four Pinboard notes, one for each theme, each 1 - 2 sentences

Reflect (Data Privacy / Job Impact / Ethical Concerns / Cyber Security)

- **Data Privacy:** Would you be comfortable if a real guest's name and booking went through this chat? Why or why not?
- **Job Impact:** Which task took the agent seconds that would take a person minutes? What does the person do instead now?
- **Ethical Concerns:** When the agent was unsure, did it admit it, or answer confidently anyway?
- **Cyber Security:** If an attacker had this number, what harmful requests might they try?
