ACTIVITY PACK

Activity 3: Prompts

Activity 3 - Create and Redesign a PowerPoint with the Agent

Course	AI Agent Security
Course code	C28
Version	1.0 | 30 September 2026

Tertiary Infotech Pte Ltd | UEN 201200696W

Prompts

Activity 3 - Create, Then Redesign

Evidence status: SIM - the decks are generated teaching output. Use these prompts in the Hermes (MiniMax) agent. Send the CREATE prompt first; save the deck to your Downloads folder; then upload `new-template.avif` and send the REDESIGN prompt.

Prompt 1 - CREATE (send first)

"Create a **10-slide PowerPoint presentation** on **AI Security for AI Agents**.
- Cover: what an AI agent is, why agents create new security risks, prompt injection, data leakage, tool and skill misuse, human-in-the-loop controls, governance, and a closing summary.
- One clear idea per slide, with **2 - 4 short bullets** each.
- Add **speaker notes** on every slide.
- Return the finished deck as a **downloadable PowerPoint file**."

When it completes: download the file and **save it to your Downloads folder**.

Prompt 2 - REDESIGN (upload `new-template.avif` first, then send)

"Redesign the 10-slide presentation using the **uploaded image as the visual template**.
- Apply its style across **all 10 slides**: dark cybersecurity background, neon cyan circuitry and frames, the AI-shield and fingerprint imagery, red/orange accent highlights.
- **Keep all slide content and speaker notes unchanged** - this is a redesign, not a rewrite.
- Return the redesigned deck as a **downloadable PowerPoint file**."

When it completes: save the redesigned deck to your **Downloads folder** and compare it with the first version.

Compare - three things the image template changed

1. _____ (e.g. colour scheme and background)
2. _____ (e.g. imagery - shield, circuitry, fingerprint)
3. _____ (e.g. overall mood - corporate vs cyber)
