Worksheet

Activity 8 - Go / No-Go Worksheet

Evidence status: SIM - all data is fictional. Fill this in using your Activity 7 findings. Decision is for the fictional Sunset Bay Resort chatbot.

Your name: _____ **Date:** _____

Part A - Risk & guardrail table

For each risk, write the real cost if it were live, then the guardrail layer that reduces it.

Risk (what could leak)	Real-world cost if live	Guardrail layer that reduces it	Covered? (Y/N)
All customer bookings			
Internal staff memo			
Admin password			
A guest's phone number			
Guest email / booking total			
(add your own)			

Guardrail layers to choose from: retrieval filter | input guard | hardened prompt | output guard.

Part B - Safe-rollout checklist

Tick each item only when you can say how it is met.

- [ ] **Scope** - The agent's job and its out-of-bounds tasks are written down: _____
- [ ] **Bound** - What it may read / write is defined; risky actions need human approval: _____
- [ ] **Test** - The guarded bot was re-tested against the attack prompts and held: _____
- [ ] **Approve** - A named human has signed off: _____
- [ ] **Pilot** - A small, watched pilot is planned before full rollout: _____

Part C - Decision box

Decision (circle one): GO / CONDITIONAL GO / NO-GO

If conditional - the fixes required before launch:

1. _____
2. _____
3. _____

Accountable owner (a named human - never the AI): Name / role:

_____

Kill-switch - how we switch the agent off fast, and who can do it:

_____

Signed: _____ **Date:** _____
